Form C – Offering Statement

Regulation Crowdfunding (Reg CF) Equity Offering

Issuer: Joyride Technologies, Inc.

Target Raise: \$1,000,000

Security Type: Common Stock (Equity)

Date of Draft: June 23, 2026

Part I: Issuer and Offering Information

Issuer Information

- **Legal Name of Issuer:** Joyride Technologies, Inc.
- **DBA / Trade Name:** Joyride
- **Principal Place of Business / Mailing Address:** 403 Highlands Lake Dr, Cary, NC 27518
- **Website:** <https://joyride.cool>
- **Phone:** 650-427-9335
- **Email for Investor Inquiries:** dave@joyride.cool
- **State / Country of Incorporation:** Florida
- **Date of Incorporation / Formation:** June 16, 2026

- **EIN / Tax ID:** EIN - 42-3188582
- **Fiscal Year End:** December 31
- **Number of Employees:** 1 (Founder & CEO; contractors/consultants as needed)
- **Company Status:** Early-stage startup / development stage. Not a reporting company, not an investment company, not a SPAC, and no “bad actor” disqualifications known.

Offering Information

- **Target Offering Amount:** \$1,000,000
- **Maximum Offering Amount:** \$1,000,000 (or as adjusted per Reg CF cap of \$5M aggregate in 12-month period)
- **Type of Security Offered:** Common Stock (or such other class of equity securities as may be designated; exact terms, rights, preferences, and investor protections to be set forth in the Company’s Certificate of Incorporation, Bylaws, and Subscription Agreement)
- **Price per Share / Offering Price:** \$1.50 per share
- **Number of Securities Offered:** 666,667
- **Minimum Investment Amount:** \$100
- **Oversubscriptions:** Oversubscriptions are determined on a case-by-case basis
- **Deadline / Offering Period:** Dec 31, 2026.
- **Intermediary / Funding Portal:** InsightStudios at i12s.com.
- **Escrow / Custody of Funds:** Funds will be held in escrow by a qualified third-party escrow agent until the minimum target (if any) is met or offering closes, per Reg CF rules.

Use of Proceeds (approximate allocation for the \$1,000,000 raise; subject to change with good-faith updates):

Category	Approximate %	Description
Product / App Launch	35–40%	Complete and launch on-demand Rider & Driver apps, marketplace matching, payments (Stripe Connect), infrastructure (AWS/PostGIS) in initial markets (Raleigh-Durham, NC and Miami, FL).
Driver Acquisition & Growth (Fleet)	30–35%	Driver affiliate engine, content & social marketing, onboarding incentives, support to reach ~400 active For Hire commercial drivers and \$2M ARR milestone.
Operations, Compliance & Team	15–20%	Insurance RFP/compliance (TNC and For Hire), legal, regulatory, basic team/contractor support, office/tools.
Working Capital & Reserves	10–15%	Runway buffer, unexpected costs, preparation for next financing round (Series A path).
Total	100%	Milestone-driven: Launch on-demand service, expand to 400 drivers, achieve \$2M ARR proof point for Series A.

The Company intends to use proceeds in a milestone-based, capital-efficient manner. No proceeds will be used to repay existing debt to related parties or for general compensation beyond reasonable operational needs. Any material changes will be disclosed via Form C amendment.

Part II: Business Description, Risks, and Other Required Disclosures

Business Description

Joyride Technologies, Inc. is building **the Amazon of ground transportation** — a true free-market marketplace platform for rides where **Drivers can keep 100% of every fare** (via transparent monthly subscription plans) and **Riders get better, more consistent, reliable service at competitive or lower prices.**

Core Value Proposition & Differentiation

- **Drivers** run their own business on the platform: set their own prices (or bid), own their client lists/relationships, control which rides they accept (punishment-free), receive paid wait time, full payment transparency, and mini-map rendezvous features.
- Subscription plans (examples from current model):
 - \$0/month + 15% transaction fee (Starter – easy onboarding)
 - \$249/month + 7% transaction fee (Growth)
 - \$499/month + 0% transaction fee (Pro – keep 100% of every fare)
- **Riders** benefit from higher-quality, professional Drivers, cleaner cars (especially Premium/Luxury focus initially), better reliability, and the ability to filter by price, wait time, rating, and favorites.
- The platform never touches the fare money — it flows directly from Rider to Driver. Joyride earns revenue from predictable Driver subscriptions and modest transaction fees on lower-tier plans.

Current Status & Traction (as of mid-2026)

- Complete technical MVP: Rider app, Driver app, real-time marketplace matching, admin tools — built and in testing on AWS/PostGIS + Stripe Connect.
- Founder-led validation: David Linhardt (Founder & First Driver) has personally completed **18,000+ Uber/Lyft rides**, conducted **5,000+ Rider & Driver interviews**, and generated **\$180,000+ in cumulative revenue** from rideshare driving.
- One-car scheduled-ride pilot (Tesla Model Y): **117 direct Customers** booked (23% card-to-booking conversion), **314 scheduled rides**, **\$19,000+ direct-to-Customer revenue**. Strong indication Riders seek a third alternative.
- Early CAC was negative (paid to drive on Uber/Lyft while migrating Customers). No paid marketing spend to date.

- Launching initially with **commercially licensed For Hire Drivers** (no TNC/personal vehicle insurance required yet). TNC insurance RFP issued May 27, 2026; evaluating options.
- Initial geographic focus: Raleigh-Durham, NC MSA and Miami, FL.

Go-to-Market & Growth Strategy

1. Launch on-demand service in targeted high-income neighborhoods (e.g., Hayes Barton in Raleigh) where 200 vehicles can provide excess capacity and neutralize incumbent wait-time advantages.
2. Driver Affiliate Engine: Every Driver gets a personal profile page and affiliate link to promote Joyride and build their own client list.
3. Content & Education: Sharp, satirical content highlighting real problems with incumbents (filthy cars, declining quality, high take rates, broken feedback loops) — Dollar Shave Club-style approach.
4. Flywheel: Better pay (60%+ higher than Uber/Lyft on Pro plan) → attracts better Drivers → better rides → loyal Riders → reinforced Driver earnings and organic growth.
5. Phased expansion: Prove model in one market (400 Drivers → \$2M ARR), then scale nationally. Future verticals may include fleet operations (Joyride Transportation) and specialized insurance (Joyride Insurance).

Market Opportunity

- US Premium & Luxury ground transportation TAM estimated at ~\$19.7 billion annually.
- Incumbents (Uber ~75%, Lyft ~25%) have take rates of ~40% (recently redefined downward for optics; actual Driver experience often worse). Historical platform rakes in other industries average 10–20%. Empower Rideshare precedent: \$450M+ bookings in 7 years with low/no transaction-fee model.
- Structural vulnerabilities in incumbent model create opening for a Driver-respecting, low-friction marketplace.

Financial Projections (Forward-Looking – Highly Speculative)

Management projects (based on current assumptions around Driver growth, retention, subscription mix, utilization, and geographic expansion):

Metric	Year 1	Year 2	Year 3
Gross Margin	~90%	~90%	~90%
EBITDA	(~\$387k)	~\$1.75M	~\$9.52M
EBITDA Margin	(49%)	27%	36%
ARR	~\$2.24M	~\$12.9M	~\$43.7M

These projections are illustrative only, based on aggressive growth assumptions, and subject to numerous risks and uncertainties. Actual results will likely differ materially. The Company has limited operating history in the on-demand marketplace segment.

Intellectual Property & Technology

Custom-built apps and marketplace infrastructure. No material licensed IP dependencies disclosed.

Risk Factors (Summary – Not Exhaustive)

Investing in early-stage startups involves substantial risk, including total loss of investment. Key risks include (but are not limited to):

1. **Early Stage / Limited Operating History:** Pre-revenue or minimal revenue for the full on-demand marketplace platform. Pilot success does not guarantee scaled results.
2. **Competition & Network Effects:** Uber and Lyft have massive liquidity, brand recognition, and Driver/Rider density. Overcoming this in on-demand segment is challenging despite differentiated model.
3. **Driver Acquisition & Retention:** Success depends on attracting and retaining high-quality For Hire Drivers at scale. Churn or slow ramp could impair liquidity and unit economics.
4. **Rider Adoption:** Riders may stick with incumbents due to habit, corporate policies, or perceived reliability. Inertia is a significant barrier.
5. **Regulatory & Insurance:** Rideshare/TNC regulations vary by state/city. Obtaining affordable platform-level TNC insurance is a known barrier (only a few carriers). For Hire launch mitigates some risk but limits addressable market initially. Ongoing

compliance costs and changes in law could adversely affect the business.

6. **Key Person Risk:** Heavily dependent on Founder & CEO David Linhardt's vision, driving experience, relationships, and execution. Loss of key personnel would be material.
7. **Forward-Looking Statements & Optimistic Projections:** Financial projections and milestones (e.g., 400 Drivers / \$2M ARR) are aggressive and may not be achieved. Past pilot performance is not indicative of future results.
8. **Capital Needs & Dilution:** Additional financing will likely be required. Future rounds may dilute existing shareholders at unfavorable terms or not be available.
9. **Illiquidity & Resale Restrictions:** Reg CF securities generally cannot be resold for one year (with limited exceptions). No public market exists or is expected in the near term.
10. **Platform / Intermediary Dependence:** The offering and ongoing compliance depend on the chosen funding portal/broker-dealer. Platform changes or issues could affect the raise.
11. **Economic & Market Conditions:** Rideshare demand is sensitive to fuel prices, economic downturns, remote work trends, and competition from public transit/AVs.
12. **Technology & Cybersecurity:** Platform relies on complex software, mapping, payments, and real-time matching. Outages, bugs, data breaches, or AI/FSD-related issues could harm reputation and operations.
13. **Related Party / Concentration:** Operations may involve entities or arrangements connected to the Founder (e.g., InsightStudios). Conflicts of interest possible.
14. **No Guarantee of Success or Exit:** There is no assurance the Company will achieve profitability, complete a successful exit (acquisition/IPO), or generate returns for investors. Many startups fail.

Management, Directors, Officers, and Key Persons

David Linhardt – Founder & CEO (sole executive officer and director currently)

- 11-time entrepreneur and 5-time Fortune 500 marketing/product executive.
- Previously: Head of Product & Entrepreneur-in-Residence (L7) at Amazon (led \$350M high-margin B2B two-sided marketplace); SVP AI/Data at Yesmail (grew from \$20M to \$300M revenue, successful exit); senior roles at Experian and AT&T Wireless.
- Education: B.S. Chemical Engineering, Purdue University; MBA, Harvard Business School.
- Experience: Founded/led multiple startups and venture studios (InsightStudios – 8 exits, ~\$2B value created). Deep expertise in AI/ML, SaaS marketplaces, product development, and scaling platforms.
- Current role at Joyride: Full-time Founder & First Driver. Personally validated the problem through 18,000+ rides and 5,000+ interviews. Running Joyride out of his startup studio, InsightStudios.
- Compensation: [To be disclosed; currently founder-level / minimal cash compensation with equity upside.]
- Beneficial Ownership: [David Linhardt beneficially owns [X]% of the Company on a fully-diluted basis pre- or post-this offering (exact percentage depends on final capitalization table and terms of this raise).]

No other directors, officers, or persons expected to make significant contributions are currently disclosed. The Company may add independent directors or key hires post-raise.

Beneficial Owners of 20% or More

As of the date of this draft, David Linhardt is the sole or primary beneficial owner of more than 20% of the voting securities of the Company. Exact ownership percentages post-financing will be updated in the final Form C and capitalization table.

Related Party Transactions

The Company may have arrangements with InsightStudios (Founder's venture studio) for operational support, shared resources, or incubation services. Any material related-party transactions will be fully disclosed in the final offering documents and ongoing reports. No other material related-party transactions are known at this time.

Financial Statements

Requirement Note: Joyride Technologies has been operating for less than a year and does not have audited financials at this time.

Current Status:

Joyride Technologies, Inc. is in the early development / pilot stage with limited operating history for the full marketplace platform.

- **Pilot / Inception-to-Date Activity** (approximate, unaudited): ~\$19,000+ revenue from scheduled rides in one-car pilot; minimal other revenue/expenses to date for platform operations. Significant founder sweat equity and personal investment in validation and MVP development.
- **Balance Sheet** \$5,000 in cash and cash equivalents; company Tesla vehicle, software/IP capitalized or expensed); low liabilities; equity reflecting founder contributions and any prior financing.
- **Statements of Operations, Cash Flows, and Changes in Stockholders' Equity:** Minimal activity; net loss reflecting development costs, legal/compliance, and early operations.

The Company will file annual reports on Form C-AR and such other reports as required by Reg CF.

Other Disclosures

- **Bad Actor Disclosure:** To the best of the Company's knowledge, neither the issuer, its predecessors, nor any covered persons (directors, officers, beneficial owners >20%, promoters, etc.) are subject to "bad actor" disqualification events under Reg CF / Rule 506(d).
- **Ongoing Reporting:** The Company will comply with all Reg CF ongoing reporting obligations, including annual reports (Form C-AR) within 120 days of fiscal year-end, progress updates, and amendments for material changes.
- **Resale Restrictions:** Securities purchased in this offering generally may not be resold for one year from the date of purchase, except in limited circumstances (e.g., to the issuer, accredited investors, or in registered offerings).
- **Investor Limits:** Non-accredited investors are subject to investment limits based on income/net worth (generally 5–10% of the greater of annual income or net worth,

up to \$124k aggregate across all Reg CF investments in a 12-month period). The intermediary will enforce these limits. Accredited investors have no such cap.

- **No Investment Advice:** The intermediary and issuer will not provide investment advice or recommendations. Investors must conduct their own due diligence.
- **Additional Information:** A data room with additional details (full business plan, cap table, detailed financials, legal docs, etc.) will be made available to qualified investors through the funding portal or upon request after NDA / qualification.

Signature / Certification

The issuer certifies that the information contained in this Form C (when finalized) is true, accurate, and complete to the best of its knowledge and belief, and that the financial statements (when included) fairly present the financial condition and results of operations in accordance with GAAP (or other applicable basis noted).

Joyride Technologies, Inc.

David Linhardt

Founder & CEO
